

## Section 4 – Ship Access

All access should be marked on the ship's GA plan and documented in the relevant Access table.

| Access table  | Access points  |
|---|--|
| Access 1 – to vessel<br>(possible unauthorized access points) | Mooring lines<br>Anchor chains<br>Pilot ladders/Jacobs ladder<br>Gangways<br>Ramps<br>Cranes<br>Hoists<br>Bunker Stations<br>Discharge hoses |
| Access 2 – within vessel                                      | Doors<br>Ramps<br>Emergency/Escape hatches<br>Cargo hatches, doors, ports<br>Ports, scuttles   |

Information must be included for:

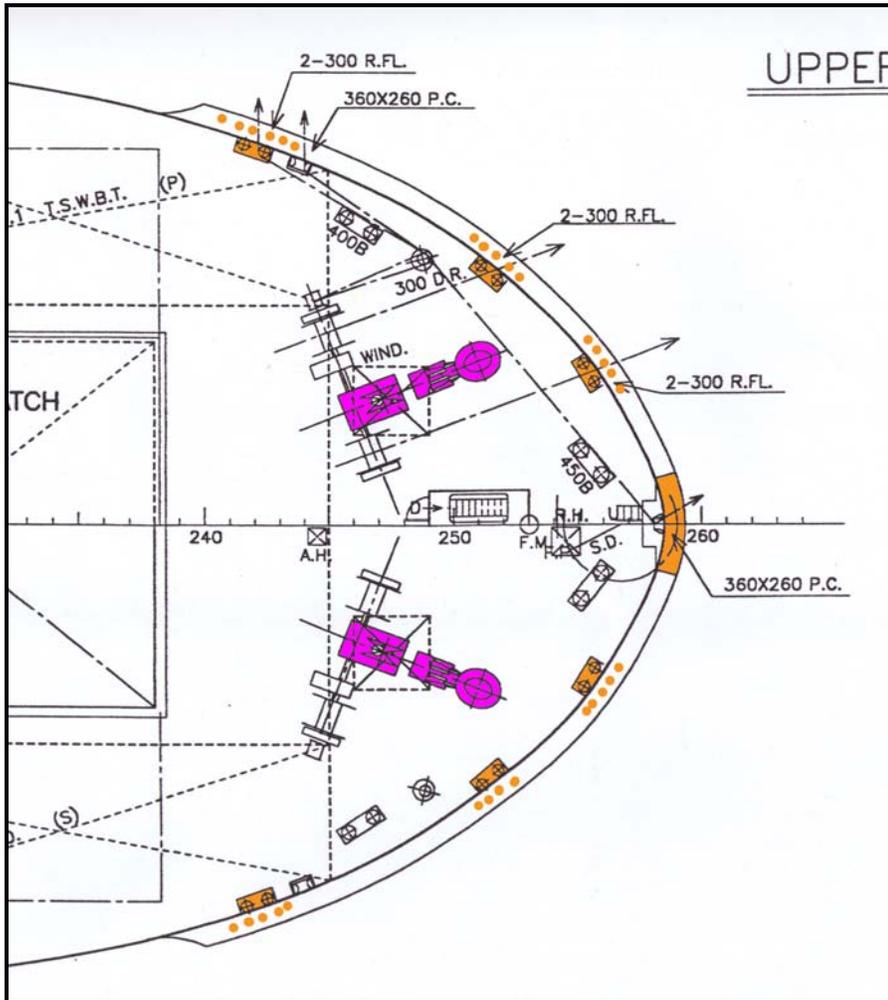

- In port alongside
- At anchor
- At sea under passage

Each door or entry point requires an identification number. The easiest way to do this is deck by deck using the ship's GA plan and confirmed during the On-scene Security Survey. See the example GA plan and tables on the following pages.

ISPS Code – Practical Pack

An excerpt from a partially marked up General Arrangement Plan, showing Access To vessel:

**Key:**

| Colour  |   | Description   |
|---------|---|---------------|
| Magenta |  | Anchor Chains |
| Brown   |  | Mooring Lines |
